Microscope covers

Our microscope covers help keep operating rooms sterile, equipment clean, and patients safe from contamination.

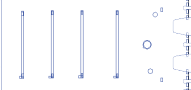

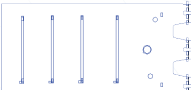

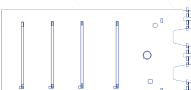

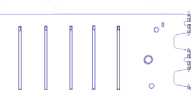

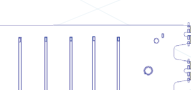

Designed specifically for common applications in a variety of specialties, our microscope covers provide accessibility: application of all segments is easy, including the lens housing and eye pieces, which are simply attached via the removable perforated eye piece area. The covers are tear resistant and are secured in place with adhesive or Velcro straps.

Together with our HLT lens, which offers the clearest vision, while maintaining a sterile environment, our covers provide the perfect solution for you.

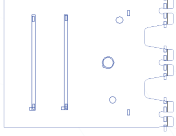

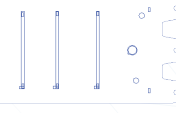

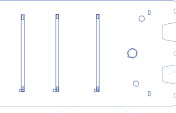

Microscope Cover for LEICA (70mm lens cover)

C-Arm covers

Our C-arm and mini C-arm covers are tear resistant, durable, and offer quick and easy application. We design our C-arm covers so that they smoothly integrate into the equipment's range of motion and do not hinder image quality. In addition, we design our covers for individual devices and customers, so they can be delivered as a single unit, or in parts to cover machine sections separately.

Pharma Sept's wide range of covers, consist of universal covers, clips system sets, and specific brand designed drapes. Each of them provides easy and quick application, full protection and sterile environment.

Video camera covers

Our video camera drapes are tailored to fit all models of commercially available video cameras employed in arthroscopy and laparoscopy. They are made of high-quality polyethylene and slide into position to save time quickly and safely. Furthermore, they are created with a wide range of features, such as telescopic tubes, elastic tips, and easy tear-off removal, which allow for maximum comfort and easy use.
